

Junior Fiber Engineer

We are looking for a motivated, detail-oriented, and dynamic individual for a full-time Junior Fiber Engineer position, with opportunities available in Limassol and Paphos.

Responsibilities:

- Support, coordinate, and supervise field teams during fiber optic network installation and maintenance activities.
- Perform splicing of fiber optic cables.
- Install and test active and passive optical equipment.
- Install fiber optic cabling within buildings.
- Conduct site surveys for fiber optic installations in buildings.
- Coordinate and supervise internal teams and external contractors involved in fiber optic works.
- Assist in the design, organization, and maintenance of the fiber optic network and related infrastructure.
- Maintain and update technical records, documentation, and network data as required by the Technical Department.
- Identify, troubleshoot, and resolve technical issues and network faults.
- Ensure prompt response to operational matters during working hours and on-call standby periods when required.
- Carry out other related duties as assigned by the employer.
- Keep the direct supervisor informed of all relevant operational matters.

Qualifications:

- Bachelor's in Electrical Engineering, Telecommunications Engineering, Electronic Engineering, or a related field
- Basic understanding of fiber optic networks (FTTH/FTTx, GPON, OLT/ONT architecture) and optical transmission principles
- Knowledge of telecom network topologies, fiber infrastructure design, and relevant telecom standards and safety regulations
- Familiarity with fiber optic testing and installation equipment (e.g., OTDR, power meter, fusion splicer)
- Previous internship or hands-on experience in telecom networks, fiber optics, or infrastructure projects will be considered an advantage
- Familiarity with Bentley, GIS, or similar design tools will be considered an advantage
- Certification in Fiber Optic Installation, Splicing, or Testing (e.g., FOA CFOT or equivalent) will be considered an asset
- Strong analytical, problem-solving, and communication skills
- Ability to work both independently and as part of a team, including field operations when required
- Valid driver's license
- Basic knowledge of MS Office (Excel, Word)
- Fluency in Greek and good command of English

Benefits:

- Competitive salary package, including a 13th salary
- Performance-based Bonus
- 21 to 25 days of annual leave
- Paid sick leave
- Free Medical Insurance
- Provident Fund
- Complimentary telecom services
- Support for obtaining industry-relevant certifications
