

WE ARE HIRING

POSITION: **BIM Mechanical Engineer - Building Services – Revit MEP**

Violari Associates is seeking a **BIM Mechanical Engineer** to join our Building Services team.

The successful candidate will be involved in the design, development, and coordination of BIM models for building projects.

Strong proficiency in Autodesk Revit MEP and a solid understanding of BIM workflows are essential requirements for this position.

Key Responsibilities

- Design and development of MEP building services systems.
- Creation, management, and coordination of BIM models using Revit MEP.
- Preparation of technical drawings, quantity take-offs, and specifications.
- Collaboration with architects, structural engineers, and other disciplines as part of BIM Coordination processes.
- Identification and resolution of system clashes through model coordination.
- Technical support during project implementation and construction phases.
- Site visits and coordination meetings when required.

Requirements

- Degree in Mechanical Engineering.
- Strong working knowledge and practical experience in **Autodesk Revit MEP**.
- Good understanding and application of **BIM processes and BIM Coordination**.
- Experience in the creation and management of BIM models for building projects.
- Good knowledge of AutoCAD.
- **Fluent English (written and spoken) is essential.**
- **Knowledge of Greek will be considered an advantage.**
- **Valid driving license.**
- Ability to work effectively within multidisciplinary teams.
