**Title :** Natural gas fuelling stations. CNG stations for fuelling vehicles  
**Scope :** This standard covers the design, construction, operation, maintenance and inspection of Compressed Natural Gas (CNG) fuelling stations, including equipment, safety and control devices. This standard also applies to the fuelling stations where the CNG used in the filling unit comes from the vaporization of LNG in accordance with NP XXX LNG. This Standard encompasses all the equipment downstream of the fuelling station safety valve, i.e., the separation point between the CNG fuelling station and the distribution and/or transportation network of natural gas. This standard applies to the following types of fuelling stations (private or public access): - CNG fuelling station with fixed storage; - CNG fuelling station with mobile storage; - CNG fuelling station without storage; - CNG mobile fuelling station; - CNG time-fill station; - CNG fast-fill station; - CNG multi - fuel fuelling station. The natural gas supplied should comply with ISO 15403-1 or applicable regulations. Note: This standard is based on the assumption that the gas entering the fuelling station is odorized. If that is not the case, additional safety requirements are specified in this standard

**Scope :** supply, including safety devices and station operations control as well as the specific equipment of the fuelling station. In the specific case of Compressed Natural Gas (CNG) fuelling stations supplied directly from the pipeline or distribution system ISO / CD 16923 should apply. This standard is also applicable to fuelling stations that receive other liquefied gases rich in methane that comply with the applicable rules on the composition of natural gas or with international standards such as ISO 13686. This standard encompasses all the equipment from the LNG tank filling point to the dispensing nozzle (inclusive). This standard is applicable to the following types of filling stations (private or public access): - Fuelling station with fixed LNG storage; - Fuelling station with mobile LNG storage; - Semi-mobile fuelling station (to be connected to permanent dispensing systems); - Mobile fuelling station; - Multi-fuel fuelling station

<b>Title :</b>	Natural gas fuelling stations. CNG stations for fuelling vehicles		
<b>Scope :</b>	This standard covers the design, construction, operation, maintenance and inspection of Compressed Natural Gas (CNG) fuelling stations, including equipment, safety and control devices. This standard also applies to the fuelling stations where the CNG used in the filling unit comes from the vaporization of LNG in accordance with NP XXX LNG. This Standard encompasses all the equipment downstream of the fuelling station safety valve, i.e., the separation point between the CNG fuelling station and the distribution and/or transportation network of natural gas. This standard applies to the following types of fuelling stations (private or public access): - CNG fuelling station with fixed storage; - CNG fuelling station with mobile storage; - CNG fuelling station without storage; - CNG mobile fuelling station; - CNG time-fill station; - CNG fast-fill station; - CNG multi - fuel fuelling station. The natural gas supplied should comply with ISO 15403-1 or applicable regulations. Note: This standard is based on the assumption that the gas entering the fuelling station is odorized. If that is not the case, additional safety requirements are specified in this standard

<b>Title :</b>	Natural gas fuelling stations. LNG stations for fuelling vehicles		
<b>Scope :</b>	This standard covers the design, construction, operation, maintenance and inspection of Liquefied Natural Gas (LNG) fuelling stations, including equipment, safety and control devices. This standard also covers the design, construction, operation, maintenance and inspection of fuelling stations using LNG as a source for Compressed Natural Gas (CNG) supply, including safety devices and station operations control as well as the specific equipment of the fuelling station. In the specific case of Compressed Natural Gas (CNG) fuelling stations supplied directly from the pipeline or distribution system ISO / CD 16923 should apply. This standard is also applicable to fuelling stations that receive other liquefied gases rich in methane that comply with the applicable rules on the composition of natural gas or with international standards such as ISO 13686. This standard encompasses all the equipment from the LNG tank filling point to the dispensing nozzle (inclusive). This standard is applicable to the following types of filling stations (private or public access): - Fuelling station with fixed LNG storage; - Fuelling station with mobile LNG storage; - Semi-mobile fuelling station (to be connected to permanent dispensing systems); - Mobile fuelling station; - Multi-fuel fuelling station

Title :	Natural gas fuelling stations. CNG stations for fuelling vehicles		
Scope :	This standard covers the design, construction, operation, maintenance and inspection of Compressed Natural Gas (CNG) fuelling stations, including equipment, safety and control devices. This standard also applies to the fuelling stations where the CNG used in the filling unit comes from the vaporization of LNG in accordance with NP XXX LNG. This Standard encompasses all the equipment downstream of the fuelling station safety valve, i.e., the separation point between the CNG fuelling station and the distribution and/or transportation network of natural gas. This standard applies to the following types of fuelling stations (private or public access): - CNG fuelling station with fixed storage; - CNG fuelling station with mobile storage; - CNG fuelling station without storage; - CNG mobile fuelling station; - CNG time-fill station; - CNG fast-fill station; - CNG multi - fuel fuelling station. The natural gas supplied should comply with ISO 15403-1 or applicable regulations. Note: This standard is based on the assumption that the gas entering the fuelling station is odorized. If that is not the case, additional safety requirements are specified in this standard
