

# FRANCESCO GAROFALO JACOPO GENNARI FESLIKENIAN

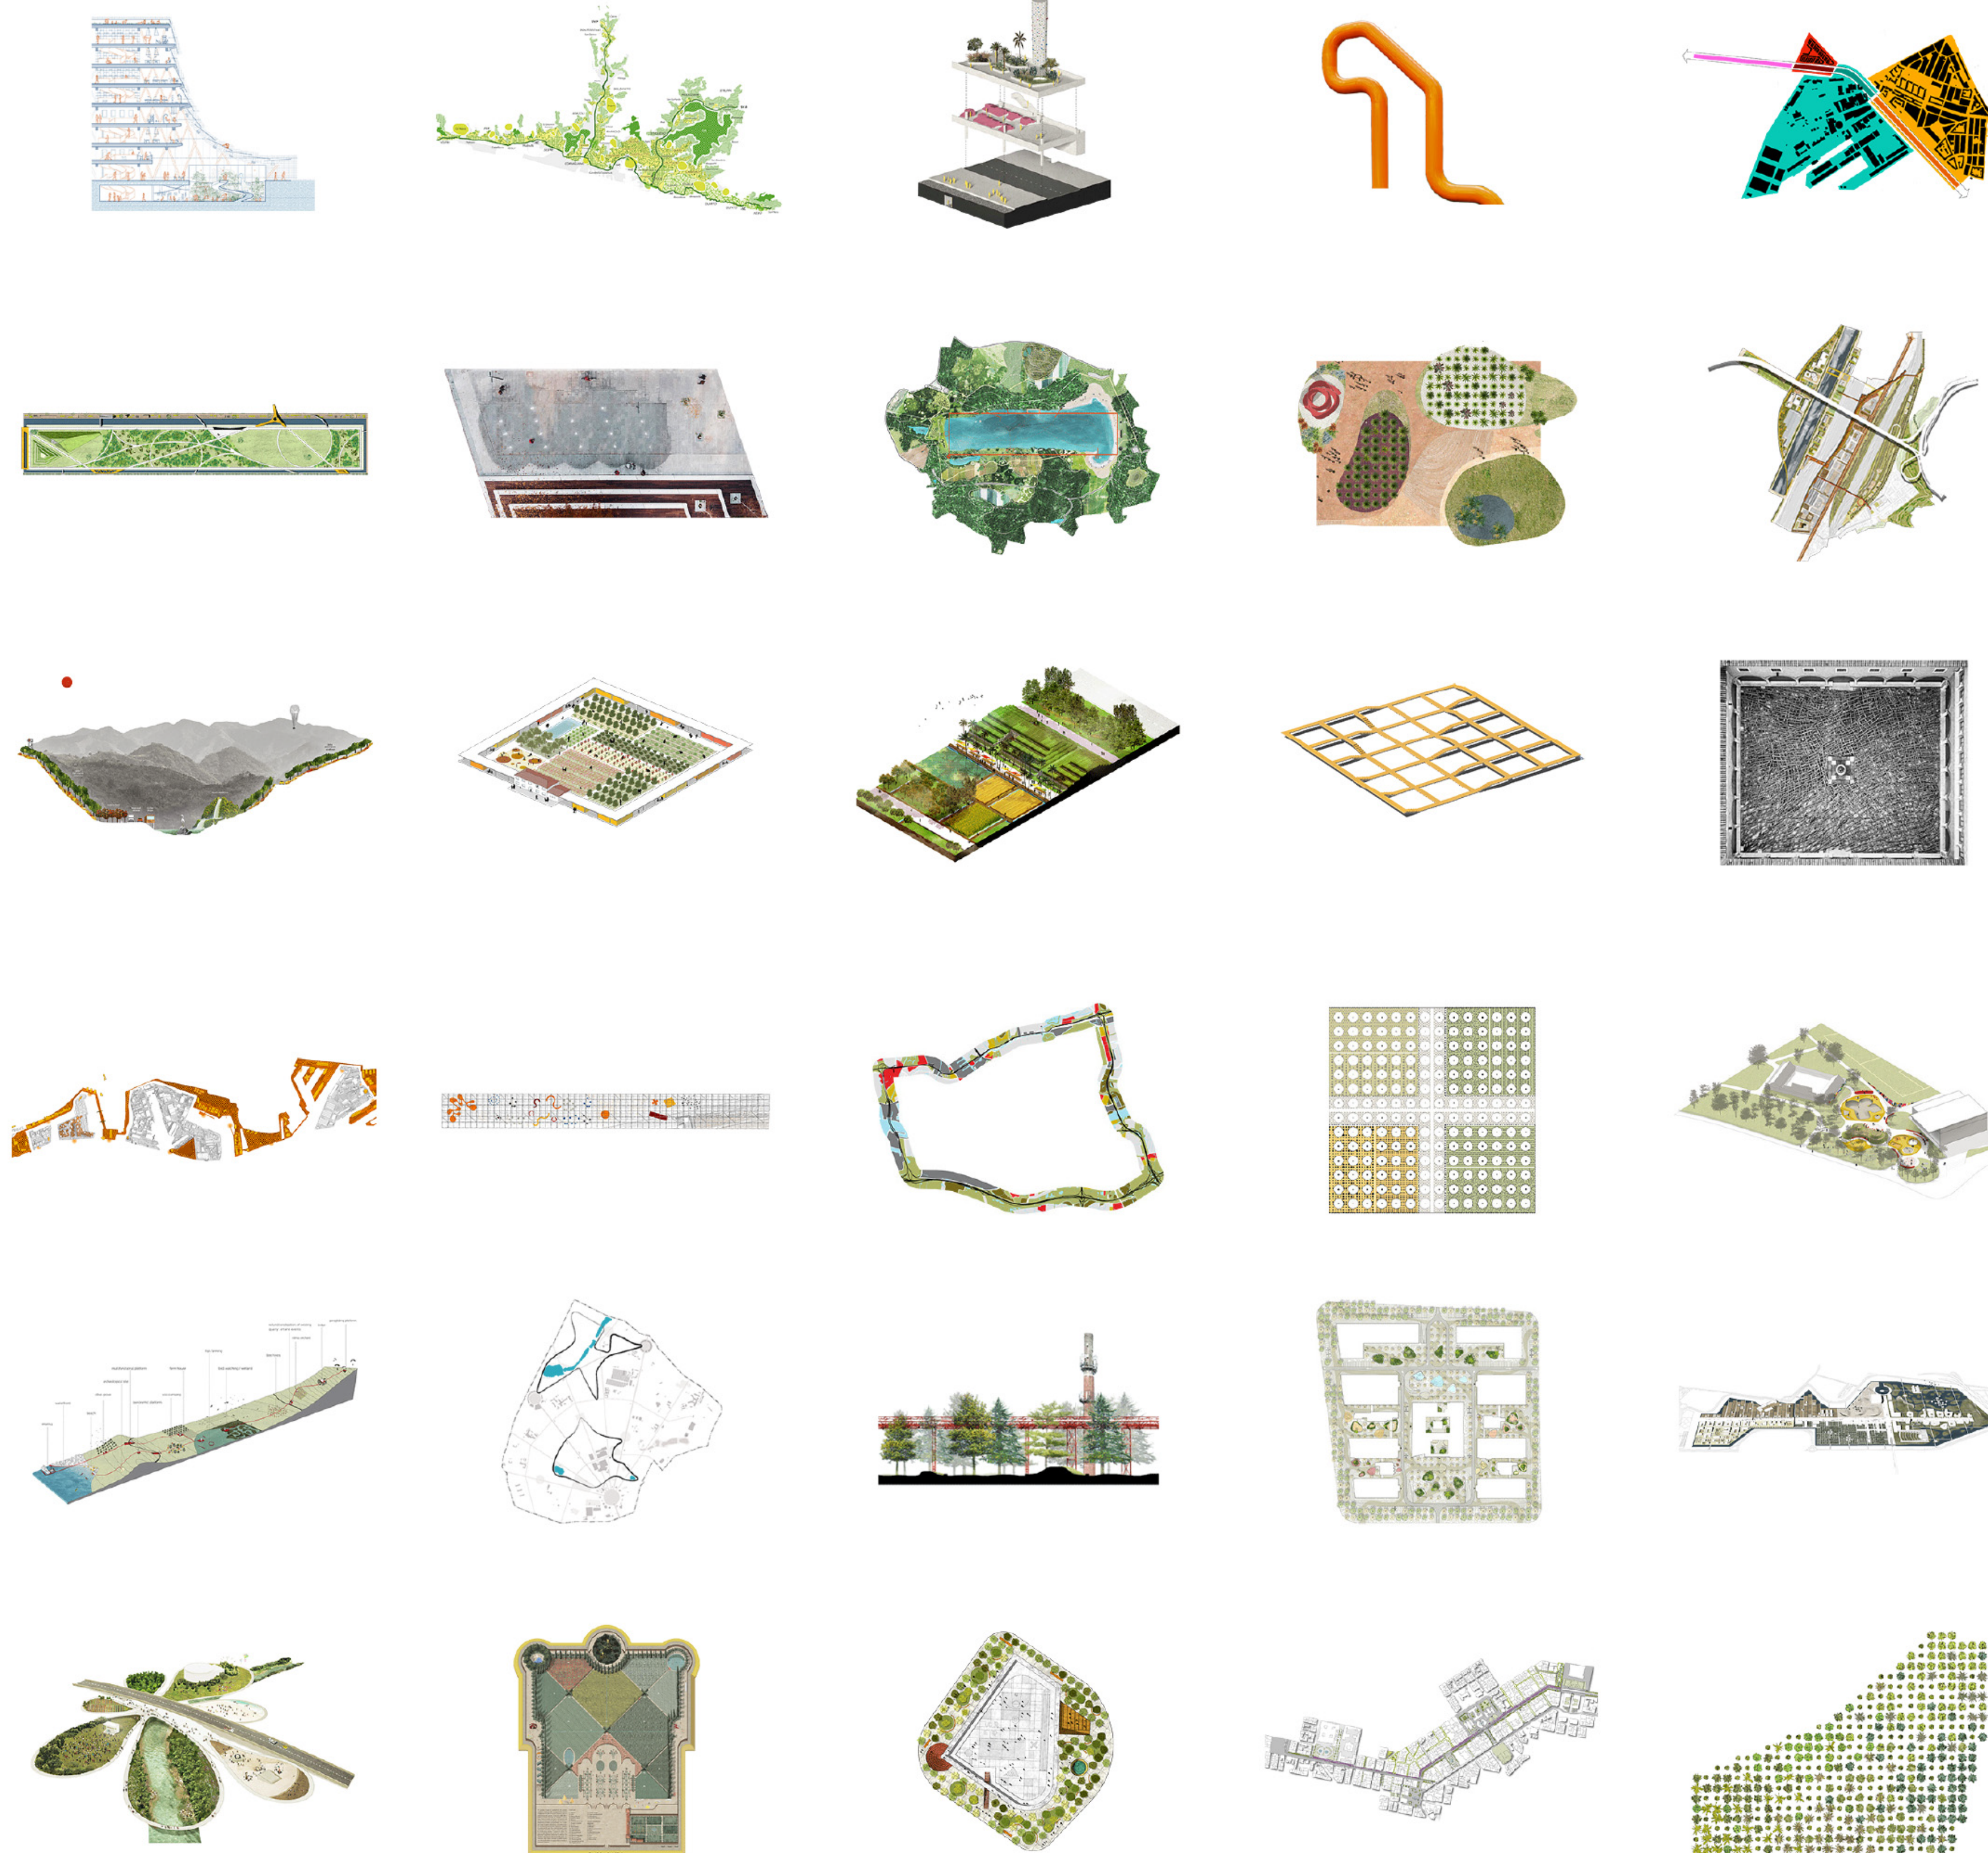

## Openfabric

**23.02.2023**  
19:00-20:30 [EET]

**Coffee Table**

**Notes and Reflections on Unexpected Trajectories**

The lecture will unfold as a number of narratives in the form of a conversation.

Spatial Songlines following different trajectories -sometimes apparently conflicting, which are the foundation of our work.

Can a similar methodology be found in desert context and in Siberia?

Can a consistent approach be preserved in a concrete tile as much as in a region?

Can we design public spaces and at the same time our planet, and beyond, the outer space?

Openfabric is an international landscape architecture and urbanism practice based in Rotterdam and Milan.

We design open public spaces at multiple scales. We focus on urban and rural geographies, investigating the global implications of urbanisation.

Openfabric is a landscape architecture and urbanism practice based in Rotterdam and Milan founded in 2011 by Francesco Garofalo.

Openfabric is composed by an international team of diverse professionals, active locally and globally, with projects extending in more than twenty countries in five different continents.

Our clients span from public administrations (Amsterdam, Milan, Moscow, Paris, Shanghai) to private clients and organisations (WWF, FAO, Strelka KB, Triennale di Milano).

Our research focuses on the implications of the contemporary planetary urbanisation condition at the global scale generating spaces, installations, cartographies from a critical standpoint.

Our projects address spontaneity rather than imposing rigid design solutions, favouring under-programmed spaces and flexible uses.

We value everything which is apparently unnoticed, elevating the city as the stage of the everyday life.

A125a, 75 Kallipoleos Ave, 1678, Nicosia
