

Geolmaging Ltd, Cyprus University of Technology and the Sewerage Board of Nicosia invite you to the ARinfuse online event and training seminar

# Exploiting the potential of Augmented Reality & Geospatial Technologies within the utilities sector

**Thursday January 28, 2021 10:00-14:00 EET (09:00-13:00 CET)**

ARinfuse is an Erasmus+ project that aims to in-fuse skills in **Augmented Reality for geospatial information management in the context of utility underground infrastructures**, such as water, sewage, electricity, gas and fiber optics.

The workshop is addressed to **engineering students and professionals** that are interested in the function, appliance and benefits of AR and geospatial technologies in the utilities sector. The workshop will also introduce the **ARinfuse catalogue of training modules** on Augmented Reality and Geoinformatics applied within the utility infrastructure sector.

*\*Final presentation titles, timeslots and speakers will be announced soon.*

## Preliminary program\*

### Introduction to the ARinfuse Project

- The ARinfuse project: Bridging AR with Utilities management through academic and professional training.
- From interactive to cognitive augmented reality: current trends in applied research.
- ARinfuse curriculum and business cases.

### Experience from Cyprus

- Experiences with AR, VR and smart applications in the utilities sector.

### Introduction to the ARinfuse training material

- Introduction to the ARinfuse training platform on Moodle.
- Putting AR in operation. From interactive to cognitive augmented reality: current trends in applied research.
- Cartographic Visualization from 2D to AR for underground utility.
- How to use the ARinfuse tool.
